

The Millie Mae Foundation was created in memory of  
Amelia "Millie" Mae Watkins.

Millie was only 10 months old when she was diagnosed with high risk, advanced stage 4 neuroblastoma. Millie took her final breath in the arms of both of her parents on June 6th 2017, only 8 days after her diagnosis.

Millie's parents have created the foundation in her name to help other cancer fighters and their families as they fight their diagnosis of pediatric cancer through financial support, educational information as well as any other educational resources needed.

Every day, approximately 47 kids will be diagnosed with cancer. With your support, we are able to help those families in need.

We invite you to join the Millie Mae Foundation to spread awareness and help support cancer fighters and their families.
